

#### Analysis:

We were asked to create a motion graphics composition using Adobe After Effects. The theme of this task was "Connections". I decided to create a funny story that will show that after alcohol there is more connection and easier to talk to people. I have never used this program so it was very challenging for me. At first, I made characters in Adobe Illustrator and then import them into Adobe After Effects. I am happy that my story is easy but I would add some more details.
